I had to take one of my dogs to the vet before they closed, I called for both dogs, but I couldn't find Kevin so I had to leave. I assumed he was at the house but just found out he's missing. I left my house at 5:45. I keep my bedroom window open my dogs to jump in and out to go to the bathroom. We have a gate, but it sometimes gets left open. He must have gotten out. Please help me find Kevin, we love him dearly and we need him back with us. He's a miniature pinscher around 6lbs I think he's wearing the same sweater in this picture and a harness
