I have been feeding this cat since March of 2025. He appears to be neutered and lets me pet him. I can't pick him up. He bites and scratches at times, he is a little spooky. I need to know if he has Rabie shots or has flea treatment. Or if he has a home. I call him Roley because he likes to roll on the gravel a lot. He doesn't have any feral clips on his ears.
